PRODUCTS

Percentage of Usage

1Products applied to lips2Products applied to the axillae3Products applied to the face/body using fingertips4Products related to fine fragrancesProducts applied to the body using the hands (palms), primarily le5Aon (Body lotion)Products applied to the face using the hands (palms), primarily le5Bon (Face moisturizer)Products applied to the hands using the hands (palms), primarily5Con (Hand cream)Products applied to babies using the hands (palms), primarily leat5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-off10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of frago11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frago111Bto skin from inert substrate with potential UV exposure	0.00000/
3 Products applied to the face/body using fingertips 4 Products related to fine fragrances Products applied to the body using the hands (palms), primarily le 5A on (Body lotion) Products applied to the face using the hands (palms), primarily le 5B on (Face moisturizer) Products applied to the hands using the hands (palms), primarily 5C on (Hand cream) Products applied to babies using the hands (palms), primarily lead 5D (Baby cream, oil, talc) 6 Products with oral and lip exposure 7A Rinse-off products applied to the hair with some hand contact 7B Leave-on products applied to the hair with some hand contact 8 Products with significant anogenital exposure, primarily rinse-off 9 Products with body and hand exposure, primarily rinse-off 9 Household care products with mostly had contact (excluding aerosol/spray products) 10B aerosol/spray products) 9 Products with intended skin contact but minimal transfer of fraggeneration of the skin from inert substrate without UV exposure 9 Products with intended skin contact but minimal transfer of fraggeneration of the skin from inert substrate without UV exposure	0.000%
4 Products related to fine fragrances Products applied to the body using the hands (palms), primarily le 5A on (Body lotion) Products applied to the face using the hands (palms), primarily le 5B on (Face moisturizer) Products applied to the hands using the hands (palms), primarily 5C on (Hand cream) Products applied to babies using the hands (palms), primarily lead 5D (Baby cream, oil, talc) 6 Products with oral and lip exposure 7A Rinse-off products applied to the hair with some hand contact 7B Leave-on products applied to the hair with some hand contact 7B Products with significant anogenital exposure, primarily rinse-off 9 Products with body and hand exposure, primarily rinse-off 10A aerosol/spray products) Household care products with mostly had contact (household 10B aerosol/spray products) Products with intended skin contact but minimal transfer of frago 11A to skin from inert substrate with out UV exposure Products with intended skin contact but minimal transfer of frago 11B to skin from inert substrate with potential UV exposure	2.4700%
Products applied to the body using the hands (palms), primarily le5Aon (Body lotion)Products applied to the face using the hands (palms), primarily le5Bon (Face moisturizer)Products applied to the hands using the hands (palms), primarily5Con (Hand cream)Products applied to babies using the hands (palms), primarily lead5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of frago11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frago11Bto skin from inert substrate with potential UV exposure	3.4600%
5Aon (Body lotion)Products applied to the face using the hands (palms), primarily less5Bon (Face moisturizer)Products applied to the hands using the hands (palms), primarily5Con (Hand cream)Products applied to babies using the hands (palms), primarily lease5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of frago11Ato skin from inert substrate without UV exposure11Bto skin from inert substrate with potential UV exposure	12.8300%
Products applied to the face using the hands (palms), primarily le5Bon (Face moisturizer)Products applied to the hands using the hands (palms), primarily5Con (Hand cream)Products applied to babies using the hands (palms), primarily lead5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-off10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragi11Ato skin from inert substrate with out UV exposureProducts with intended skin contact but minimal transfer of fragi11Bto skin from inert substrate with potential UV exposure	ave-
5B on (Face moisturizer) Products applied to the hands using the hands (palms), primarily 5C on (Hand cream) Products applied to babies using the hands (palms), primarily lead 5D (Baby cream, oil, talc) 6 Products with oral and lip exposure 7A Rinse-off products applied to the hair with some hand contact 7B Leave-on products applied to the hair with some hand contact 8 Products with significant anogenital exposure, primarily rinse-off 9 Products with body and hand exposure, primarily rinse-off Household care products with mostly had contact (excluding 10A aerosol/spray products) Household care products with mostly had contact (household 10B aerosol/spray products) Products with intended skin contact but minimal transfer of frage 11A to skin from inert substrate without UV exposure Products with intended skin contact but minimal transfer of frage 11B to skin from inert substrate with potential UV exposure	11.8300%
Products applied to the hands using the hands (palms), primarily5Con (Hand cream)Products applied to babies using the hands (palms), primarily lead5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of frago11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frago11Bto skin from inert substrate with potential UV exposure	ave-
5Con (Hand cream)Products applied to babies using the hands (palms), primarily leaver5D(Baby cream, oil, talc)6Products with oral and lip exposure7A7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact89Products with significant anogenital exposure, primarily rinse-off99Products with body and hand exposure, primarily rinse-off10Aaerosol/spray products)10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragmentation11Ato skin from inert substrate with potential UV exposure11Bto skin from inert substrate with potential UV exposure	1.7900%
Products applied to babies using the hands (palms), primarily lead5D (Baby cream, oil, talc)6 Products with oral and lip exposure7A Rinse-off products applied to the hair with some hand contact7B Leave-on products applied to the hair with some hand contact8 Products with significant anogenital exposure, primarily rinse-off9 Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10A aerosol/spray products)Household care products with mostly had contact (household10B aerosol/spray products)Products with intended skin contact but minimal transfer of frage11A to skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11B to skin from inert substrate with potential UV exposure	eave-
5D(Baby cream, oil, talc)6Products with oral and lip exposure7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragr11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of fragr11Bto skin from inert substrate with potential UV exposure	3.4600%
 6 Products with oral and lip exposure 7A Rinse-off products applied to the hair with some hand contact 7B Leave-on products applied to the hair with some hand contact 8 Products with significant anogenital exposure, primarily rinse-off 9 Products with body and hand exposure, primarily rinse-off Household care products with mostly had contact (excluding aerosol/spray products) Household care products with mostly had contact (household 10B aerosol/spray products) Products with intended skin contact but minimal transfer of fragmentation of the skin from inert substrate without UV exposure Products with intended skin contact but minimal transfer of fragmentation of the skin from inert substrate with potential UV exposure 	e on
7ARinse-off products applied to the hair with some hand contact7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragr11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of fragr11Bto skin from inert substrate with potential UV exposure	0.5800%
7BLeave-on products applied to the hair with some hand contact8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragr11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of fragr11Bto skin from inert substrate with potential UV exposure	0.0000%
8Products with significant anogenital exposure, primarily rinse-off9Products with body and hand exposure, primarily rinse-offHousehold care products with mostly had contact (excluding10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of fragr11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of fragr11Bto skin from inert substrate with potential UV exposure	5.2600%
9 Products with body and hand exposure, primarily rinse-off Household care products with mostly had contact (excluding 10A aerosol/spray products) Household care products with mostly had contact (household 10B aerosol/spray products) Products with intended skin contact but minimal transfer of frage 11A to skin from inert substrate without UV exposure Products with intended skin contact but minimal transfer of frage 11B to skin from inert substrate with potential UV exposure	5.2600%
Household care products with mostly had contact (excluding 10A aerosol/spray products) Household care products with mostly had contact (household 10B aerosol/spray products) Products with intended skin contact but minimal transfer of frage 11A to skin from inert substrate without UV exposure Products with intended skin contact but minimal transfer of frage 11B to skin from inert substrate with potential UV exposure	0.5800%
10Aaerosol/spray products)Household care products with mostly had contact (household10Baerosol/spray products)Products with intended skin contact but minimal transfer of frage11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11Bto skin from inert substrate with potential UV exposure	5.0000%
Household care products with mostly had contact (household10B aerosol/spray products)Products with intended skin contact but minimal transfer of frage11A to skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11B to skin from inert substrate with potential UV exposure	
10Baerosol/spray products)Products with intended skin contact but minimal transfer of frage11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11Bto skin from inert substrate with potential UV exposure	2.5000%
Products with intended skin contact but minimal transfer of frag 11A to skin from inert substrate without UV exposure Products with intended skin contact but minimal transfer of frag 11B to skin from inert substrate with potential UV exposure	
11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11Bto skin from inert substrate with potential UV exposure	2.5000%
11Ato skin from inert substrate without UV exposureProducts with intended skin contact but minimal transfer of frage11Bto skin from inert substrate with potential UV exposure	ance
Products with intended skin contact but minimal transfer of frag 11B to skin from inert substrate with potential UV exposure	0.5800%
11B to skin from inert substrate with potential UV exposure	
	0.5800%
Other air care products not intended for direct skin contact, mini	
12 insignificant transfer to skin	Not restricted

The IFRA standards are based on assessments by the panel of experts of The Research Institute for Fragrance Materials.

It is the responsibility of customers to insure the safety of products manufactured by them.
